Data Collection and Preprocessing Phase

Date	15 March 2024
Team ID	xxxxxx
Project Title	Forecasting Economic Prosperity: Leveraging Machine Learning For GDP Per Capita Prediction
Maximum Marks	2 Marks

Data Quality Report Template

This data quality report will help in systematically identifying and rectifying data discrepancies, ensuring the dataset is clean, reliable, and ready for analysis and modeling.

Data Source	Data Quality Issue	Severity	Resolution Plan
Countries of the World Dataset	Missing Values in columns like GDP ($ per capita), Literacy (%), and Phones (per 1000)	High	Impute missing values using mean/median/mode or regression imputation. For categorical variables, use mode or introduce a new category 'Unknown'.
